LUCIANO RIENTE

👤 | STUDENT

- I consider myself honest, responsible and concerned about doing the things in the right way. It bothers me not knowing how something works, because of that i always try to find information and learn.

- Currently i find myself attending the last year to obtain the degree of Electronics Technician, improving my English and studying Front-End technologies on my own. I have knowledge in HTML, CSS, Javascript and Git.

- Despite i don't have working experience, my goal is to start to get it, getting better slowly and above all to incorporate new knowledge.
